

Electric Surface Heating

Trace heating cables, flexible heated hoses and heated jackets

Braude supply a range of trace heating cables and equipment to complement our range of immersion heaters. These products complement the Braude range of heaters and extend from the metal-based industries to Chemical, Petrochemical, Food Processing and Construction amongst others.

The products include self-regulating heating cable, high-temperature heating cable, control systems, thermal jackets and flexible heated hoses employed in applications throughout industry for pipes, tanks, drums, antennae, containers, flexible hoses and associated measuring equipment

Heating and control with ATEX approval

Used By

- Steel Strip Manufacturers
- Wire & Tube Manufacturers
- Metal Finishers
- Chemical Plants
- Galvanising Industry
- Aerospace Industry
- Chemical Millers
- Glass Producers

Main Features

- Tank heating
- Frost protection for pipes
- Liquid transfer eg heat melt
- Maintaining chemical process temperatures
- Full range of self regulating, constant wattage and constant power cable
- Heated jackets for tanks and valves
- Heated hoses where flexible solutions are required
- Full control available at point of use

BRAUDE Products will not corrode

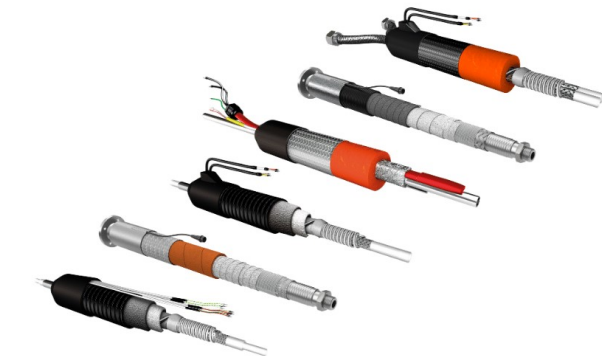

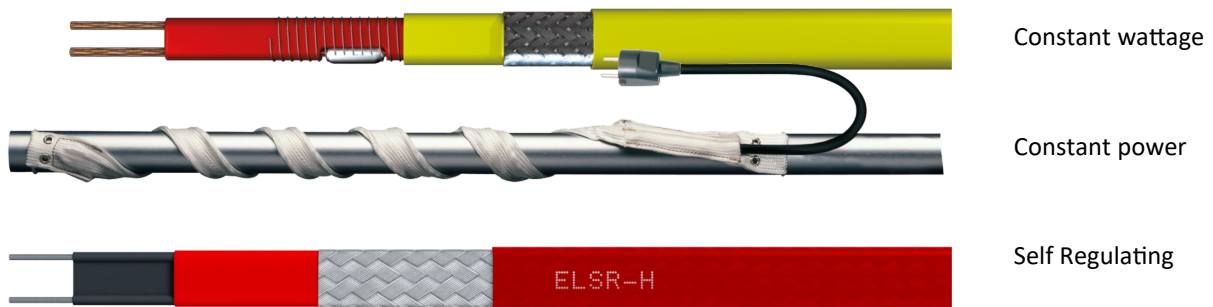

Electric Surface Heating

**Don't let this happen—protect
your tanks and pipes now**

Heating cables and tapes

Comprehensive range of self regulating and constant power/constant wattage heating cables and tapes, for applications ranging from frost protection to maintaining process temperatures up to 900°C

Heated Hoses

Electrically heated hoses designed for carrying liquids and gasses at temperatures up to

Heated Jackets

Taylor made electrically heated jackets offering optimal heat distribution and temperatures up to 900°C

Braude are specialists in all kinds of heating for industrial processes and supply a full range of heaters and equipment.
