

There is a full range of Braude temperature and liquid level controllers, protection and cut-out devices to be used in conjunction with our heaters. All controllers are supplied complete with sensors designed for use in process tanks so they are protected from attack by aggressive chemicals or by mechanical damage from workload in the tank.

# Controllers

## Example of Applications

- Steel Strip Wire & Tube Pickling
- Metal Finishers
- Glass Producers
- Chemical Millers
- Aerospace Industry
- Galvanising
- Chemical Plants

## Benefits

- 240V or 110V mains operation
- Simple to install, designed for surface mounting
- Easy connections with flying leads
- 2 & 3 wire relay output
- Non-corrodable probes
- Sealed to IP65
- Clear displays

## List of Controllers:

- Thermaster Temperature Controller
- Levelmaster Liquid Level Controller
- Tankmaster Combined Temperature and Level Controller
- Temperature and Level Probes
